A prospective seroprevalence study in a Maintenance Hemodialysis population	Johannes Kern johannes.kern@unimelb.edu.au	
	Mark Tiong	

Non- Trial COVID-19 Research

Title	PI	MACH Site
<p>COVID-19 Digital Asset (COVIDDA) would be an on-line digital mental health platform for health workers impacted by COVID-19. It will complement existing services by directing frontline health workers to appropriate information and care and by providing a space for health workers to connect and feel informed and supported based on Psychological First aid and Trauma Informed Care training.</p>	<p>Luke Burchill blj@unimelb.edu.au Wendy Chapman wendy.chapman@unimelb.edu.au Victoria Palmer wendy.chapman@unimelb.edu.au</p>	<p>RMH & University of Melbourne</p>
<p>Screening healthcare workers for asymptomatic infection: Developing scalable models for future mass implementation. The intervention would be a regular oral/nasal PCR testing of health workers. Implementation would be phased – aiming for a progressive upscaling from highest risk population through to the lower risk setting.</p>	<p>Harin Karunajeewa Harin.Karunajeewa@wh.org.au</p>	<p>Western Health</p>
<p>Coronavirus Health Outcomes in Pregnancy and Newborns: the CHOPAN registry. Aims to collect real-time data on pregnant women in Australia who are infected with COVID-19 to improve our understanding of its impact on pregnancy outcomes. This registry will provide regular feedback to clinicians and public health officials to allow evidence-based management of women and their babies with coronavirus infection.</p>	<p>Kirsten Palmer kpalmer@unimelb.edu.au Clare Whitehead clarew@unimelb.edu.au</p>	<p>Mercy Hospital</p>
